Christin Gilbert

Digital experience designer & builder

VANCOUVER, BC

My approach to experience design.

My background in cognitive neuropsychology informs how I design for cognitive accessibility: making the next step easier to find and letting people set their own pace.

I design interfaces and build working websites and tools. I document the components and behaviours so teams can maintain and extend the work.

Method and tools / page 25

How my work connects.

Brand identity and storytelling shape the work; cognitive accessibility informs how people experience it.

A SHARED LENS

Cognitive Accessibility

Clarity in what people see, understand and do.

Visual Design & Creative Production

Creates campaign graphics, imagery, videos and visual storytelling.

Experience Design

Connects visual storytelling with digital experiences, making information and actions clear.

Design Systems

Documents typography, colour, imagery and layout rules so the work stays consistent.

A clear heading

Supporting text.

Action

Motion Systems

Defines how movement supports communication and interaction.

Timing | Feedback | Control

Applied across brand campaigns, websites and digital products.

CAMPAIGN DIRECTION / CREATIVE SYSTEMS

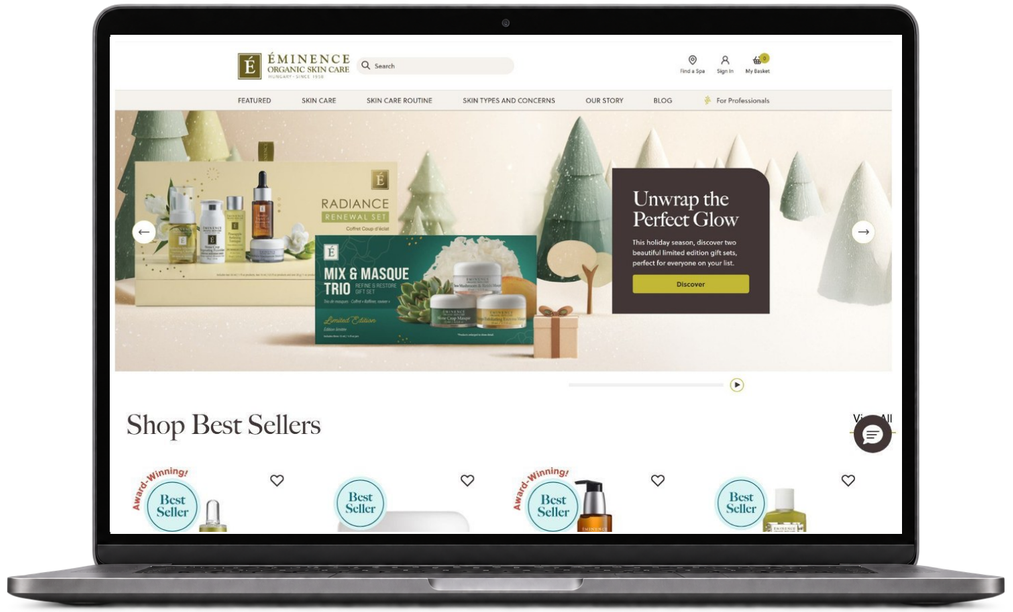

Éminence Organic Skin Care

From campaign direction to everyday production.

I created digital campaign guides and led the Digital Visual Style Guide, connecting creative direction with the details a production team needs.

MY ROLES

Digital Content Specialist to Digital Creative Team Lead
March 2020 - January 2026

Homepage composite / Holiday hero and product content

Creative production

Planning, content production, team learning and documented standards.

Production systems

6,000+ files organized with shared naming and searchable metadata.

TOOLS ACROSS ÉMINENCE CAMPAIGN WORK Adobe Creative Cloud (Photoshop, Illustrator, Premiere Pro, InDesign) · Adobe Firefly · Figma · Midjourney · Magnific AI · Asana

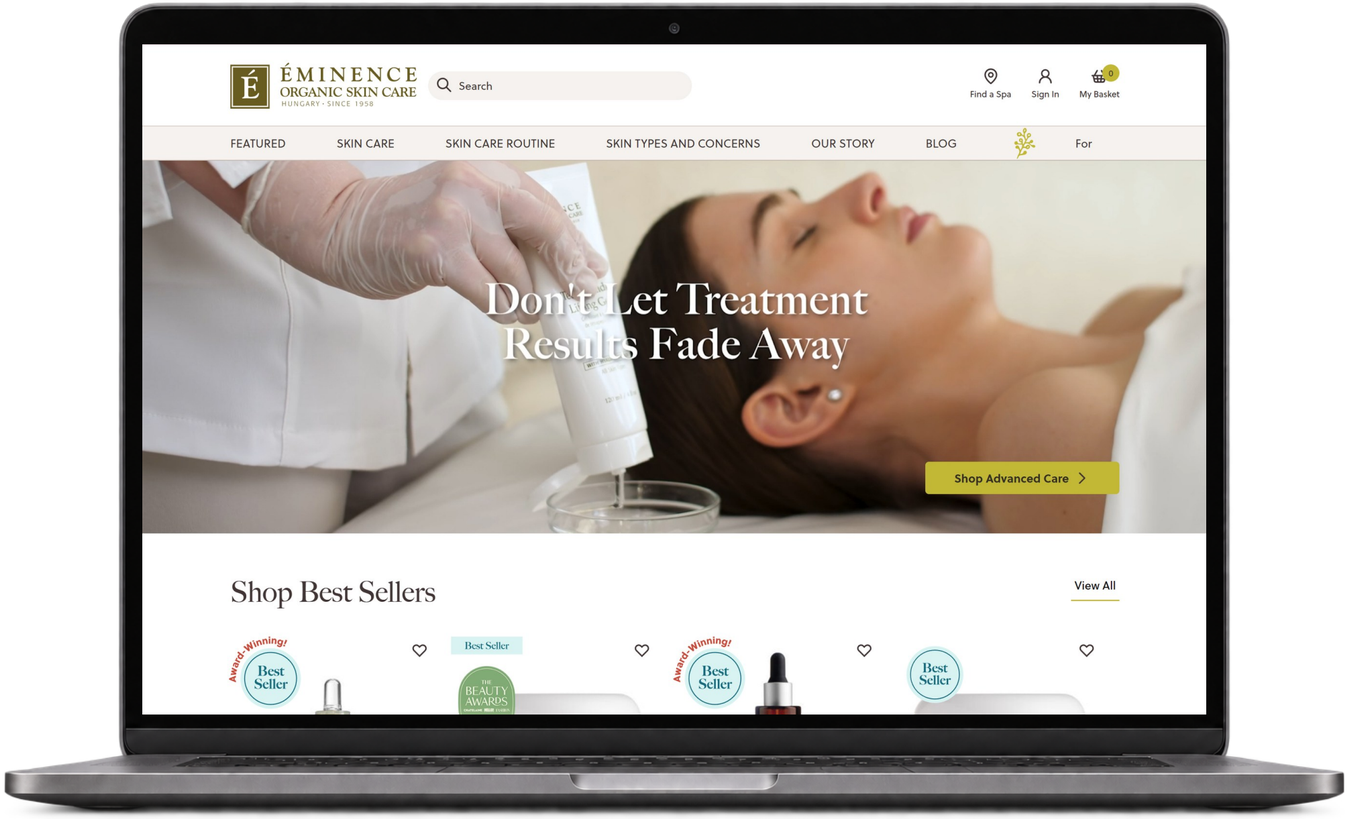

SPRING 2026 / PREPARED BEFORE DEPARTURE

From creative brief to campaign.

I developed the creative brief, coordinated pre-production and directed the shoot with external photography and video partners.

One visual direction

Wardrobe, lighting, props and tone connected the spa setting with at-home aftercare.

Campaign work prepared before my departure in January 2026.

Finished homepage application / Supplied campaign work

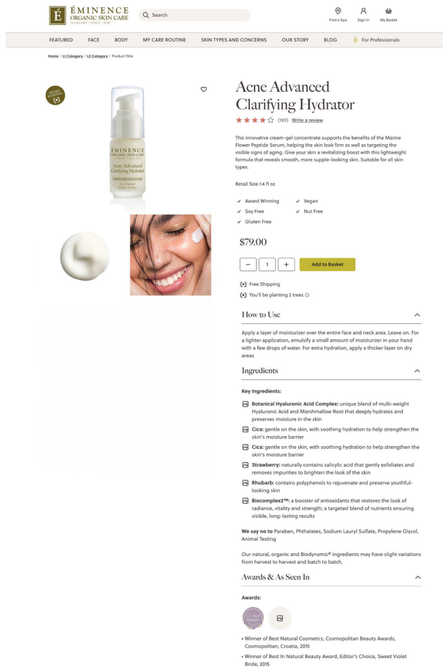

One system, four product-page layouts.

I defined reusable content modules so product pages can expand with the assets available.

MODULAR PRODUCT-PAGE SYSTEM / ORIGINAL GUIDE EXAMPLES

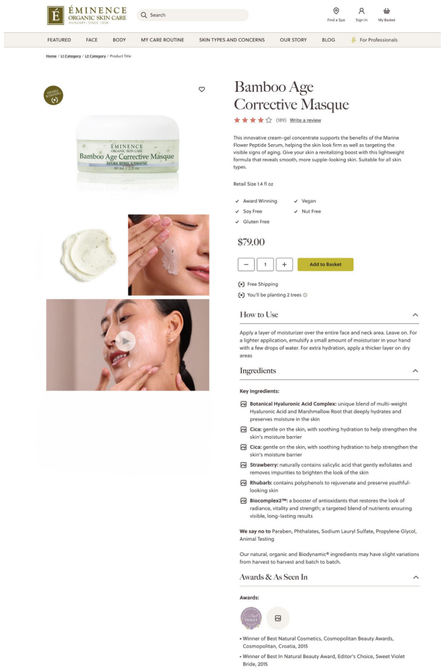

S / Essential imagery

Product image, swatch and close-up

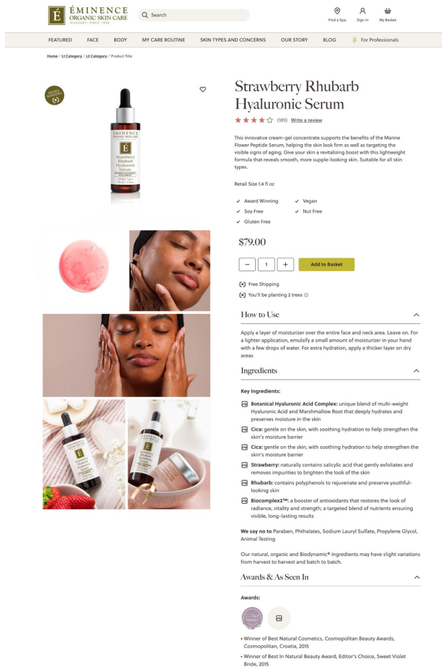

M / Add a demo

Core image modules + demo video

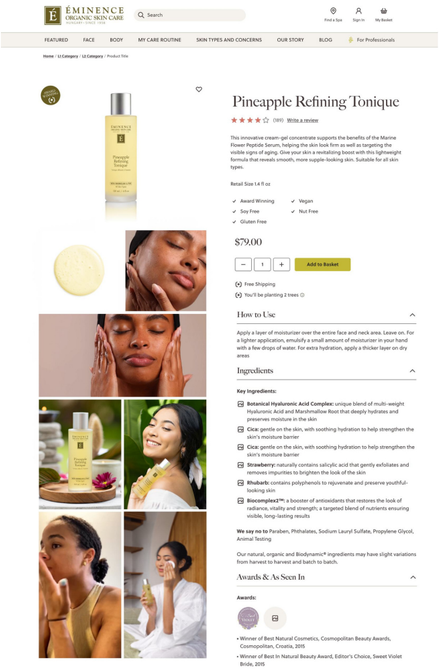

L / Add lifestyle

Demo layout + two lifestyle images

XL / Add vertical video

Lifestyle layout + two vertical videos

Digital Visual Style Guide - Website, pp. 19-26 / Layout examples from p. 26. Updated January 7, 2026.

Vitamin C Campaign – Summer 2023

Bright summer care, led by citrus.

Portrait / relaxed summer care

Product / Citrus & Kale C+E

New AI-generated imagery, based on the original campaign direction.

2026 CONCEPT REINTERPRETATION

COLOUR PALETTE / CONCEPT

Sunny yellow	Citrus coral	Leaf green	Warm ivory
#F4C62E	#F29B77	#6D8839	#F4EFE6

VISUAL DIRECTION

Bright citrus colour and relaxed human imagery.
Natural skin and fruit detail.
Clear product focus with room for digital copy.

MY CONTRIBUTION

Digital creative guidelines, content production and documentation.
2026 concepts: art direction and iterative refinement.

DIGITAL CHANNEL DISTRIBUTION

Website	Landing page	Email
Social	Blog	Spa partners

Project index

Best Sellers Campaign - Holiday 2023

Quiet gifting and a considered self-care ritual.

Gifting / Facial Recovery Oil + Apricot Whip

Flat lay / Facial Recovery Oil

New AI-generated imagery, based on the original campaign direction.

2026 CONCEPT REINTERPRETATION

COLOUR PALETTE / CONCEPT

Moss green	Warm ivory	Soft gold	Dark olive
#787956	#EFE5D5	#D4C46E	#59613B

VISUAL DIRECTION

Muted olive, ivory and warm gold.
Tactile gifting materials and restrained botanicals.
Soft light and generous breathing space.

MY CONTRIBUTION

Digital creative guidelines and a shared reference for campaign execution.
2026 concepts: art direction and iterative refinement.

DIGITAL CHANNEL DISTRIBUTION

Website	Landing page	Email
Social	Blog	Spa partners

Purify & Balance Campaign - Spring 2024

Charcoal & Black Seed Collection.

Collection / spa setting

Clay Masque / product + texture

New AI-generated imagery, based on the original campaign direction.

2026 CONCEPT REINTERPRETATION

COLOUR PALETTE / CONCEPT

Spa ivory	Charcoal	Nigella blue	Botanical green
#F1E9DC	#353331	#5379B6	#819344

VISUAL DIRECTION

A light, clean treatment-room setting.
Ivory linen, pale stone and charcoal contrast.
Blue nigella accents connect the image pair.

COLLABORATIVE CONTEXT + CONTRIBUTION

Collection direction and applications from the collaborative team guide.
2026 concepts: art direction and iterative refinement.

DIGITAL CHANNEL DISTRIBUTION

Website	Landing page	Email
Social	Blog	Spa partners

Project index

Make design decisions visible.

A documented composition review makes hierarchy, spacing and contrast explicit.

CONSIDERED LAYOUT / GUIDE EXCERPT

01 / Establish hierarchy

Make the lead message clear, then give the supporting explanation a distinct place.

02 / Balance the spacing

Review the relationship between the headline, body copy and action within the composition.

03 / Distinguish the action

Use a darker button treatment so the call to action is easier to distinguish from its surroundings.

Summer 2023 Digital Creative Guidelines, p. 16 / Documentation example; annotations restated for readability.

Build capability with clear limits.

I developed a three-session AI learning series: text to image, still to motion, then content to campaign.

02 / EXISTING PRODUCT PHOTOGRAPHY

The supplied product asset.

02 / COMPOSITED CAMPAIGN ENVIRONMENT

Existing product asset + AI-generated environment.

Production guardrails

Shared prompts and guardrails allowed generated environments and secondary elements.

Product claims, textures and skin-result imagery were outside the training scope.

Turn reporting into a testable question.

Lifestyle imagery: share of total reported email revenue within each audience.

F2025 MEASUREMENT SAMPLE

Separate from the 2023-2024 campaign examples.

Retail customers

57% Lifestyle imagery

NEXT QUESTION FOR THE BRIEF

Use lifestyle imagery as a starting direction for a matched retail email test.

Spa partners

39% Lifestyle imagery

NEXT QUESTION FOR THE BRIEF

Compare imagery within the spa-partner audience, keeping the offer consistent.

Only lifestyle imagery is shown; the remainder includes all other imagery categories. Revenue share describes the mix in the reviewed set. It does not establish conversion lift or isolate the effect of imagery.

Source: F2025 Visual Creative Production Summary, p. 9. Audience and offer should be considered in any follow-up comparison.

PUBLISHED CHROME EXTENSION

My Morning Door

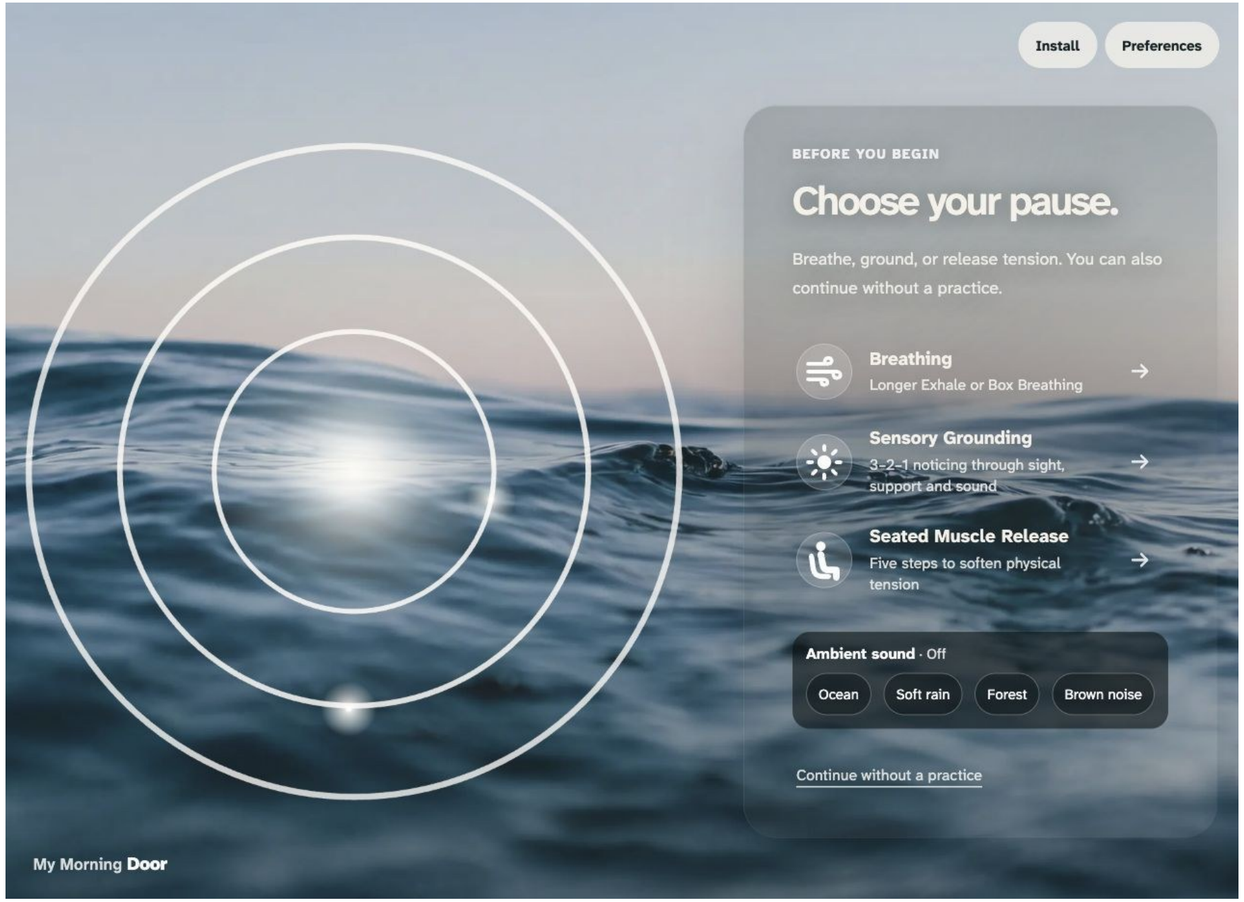

A pause, without another task.

I designed and built a new-tab extension for busy moments before browsing begins, with personal photography and optional breathing, grounding and seated-release practices.

MY ROLE

Concept, interaction design, cognitive accessibility, photography, writing and front-end implementation.

Read the case study

Current web version / Choose a practice or continue on arrival

Put the choice first.

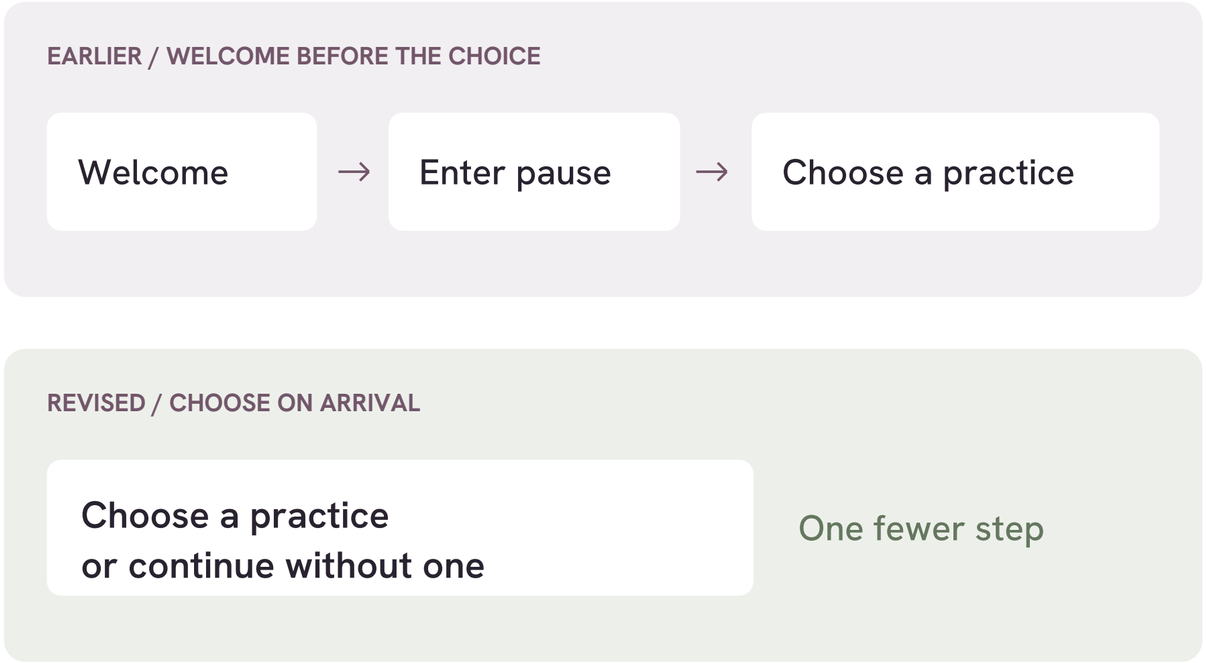

I replaced the welcome step with the practice choices so people can choose straight away.

The earlier approach

A welcome screen introduced the experience before people reached the available practices. It created a separate step before the choice.

The revision

I brought Breathing, Sensory Grounding and Seated Muscle Release onto the first interface. "Continue without a practice" remains available beside the practices.

Next check: can a first-time visitor choose a practice or continue without hesitation?

Keep every layer optional.

A direct start still leaves control with the person using it.

01 / A clear way out

"Continue without a practice" stays visible on arrival. Skipping is an intended path.

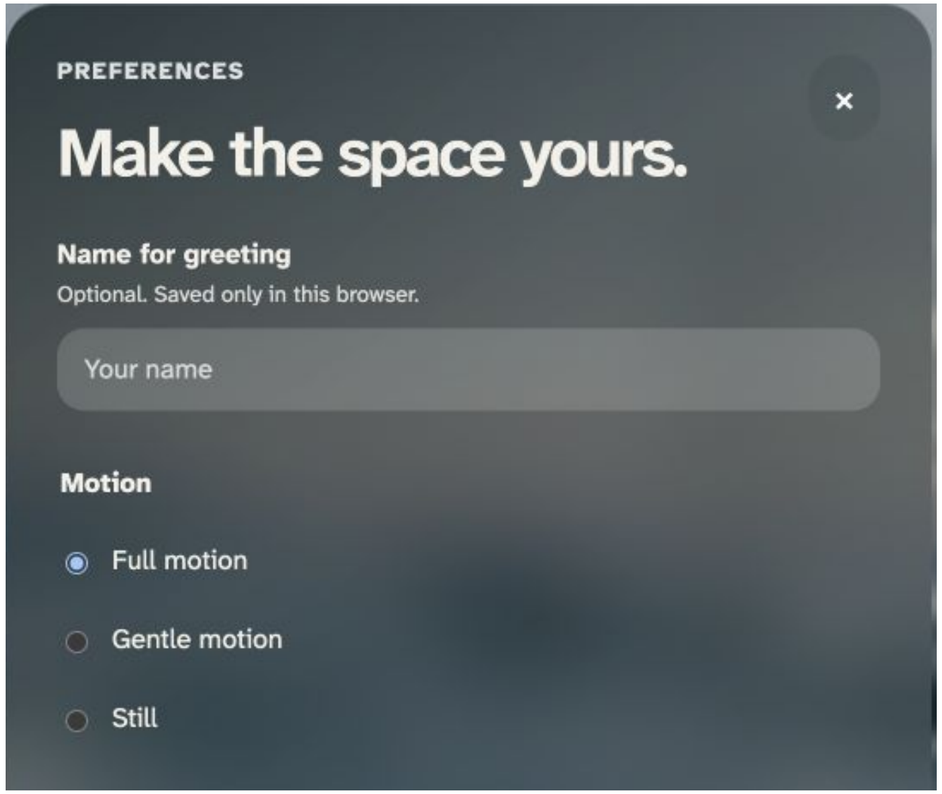

02 / Quiet by default

Ambient sound and voice guidance start off. People choose what they want to hear.

03 / Control over movement

Full, Gentle and Still are available in Preferences. Reduced motion selects Still by default; an explicit choice takes precedence.

Privacy: no account, analytics or browsing-history access. Preferences stay in the browser.

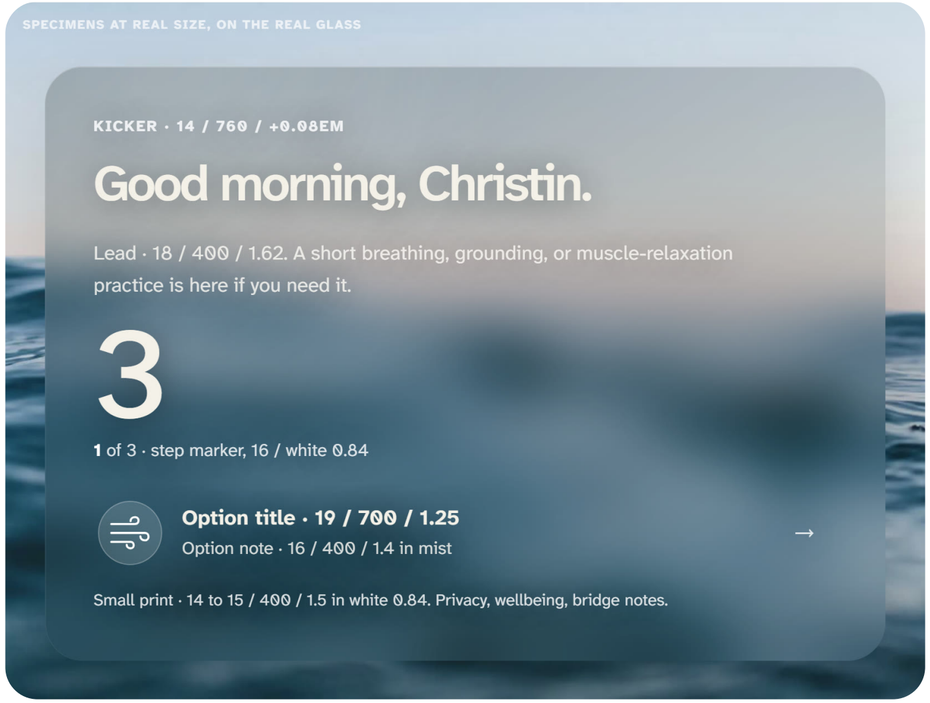

Current web preferences / Motion controls

Show the system in use.

Visual and motion specimens use the product's own CSS, photographs and timing values.

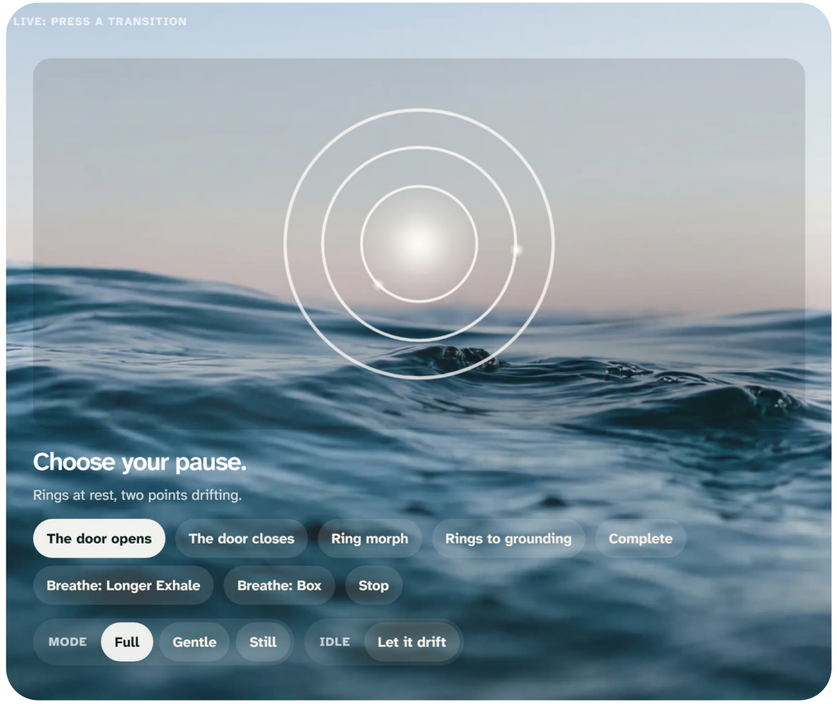

VISUAL SYSTEM / TYPE + PRACTICE COMPONENT

Explore the design system

Shipped: Chrome extension, mobile web and documented systems.

MOTION SYSTEM / THE LIVING THRESHOLD DEMO

Explore the motion system

Claude Code and Codex assisted implementation. I led design and final decisions.

Project index

LIVE WEBSITE / DESIGN AND DEVELOPMENT / 2026

Himalayan Green Trips

Trek routes, travel dates and packing checklists.

I designed and built the website, with route details, a mountain skyline using NASA elevation data, a trip calendar and packing checklists for each trek.

Live website / Desktop and mobile

DAILY TREKKING DETAILS

When visitors select a specific day, they will see the trekking details for that day, including accommodation and elevation.

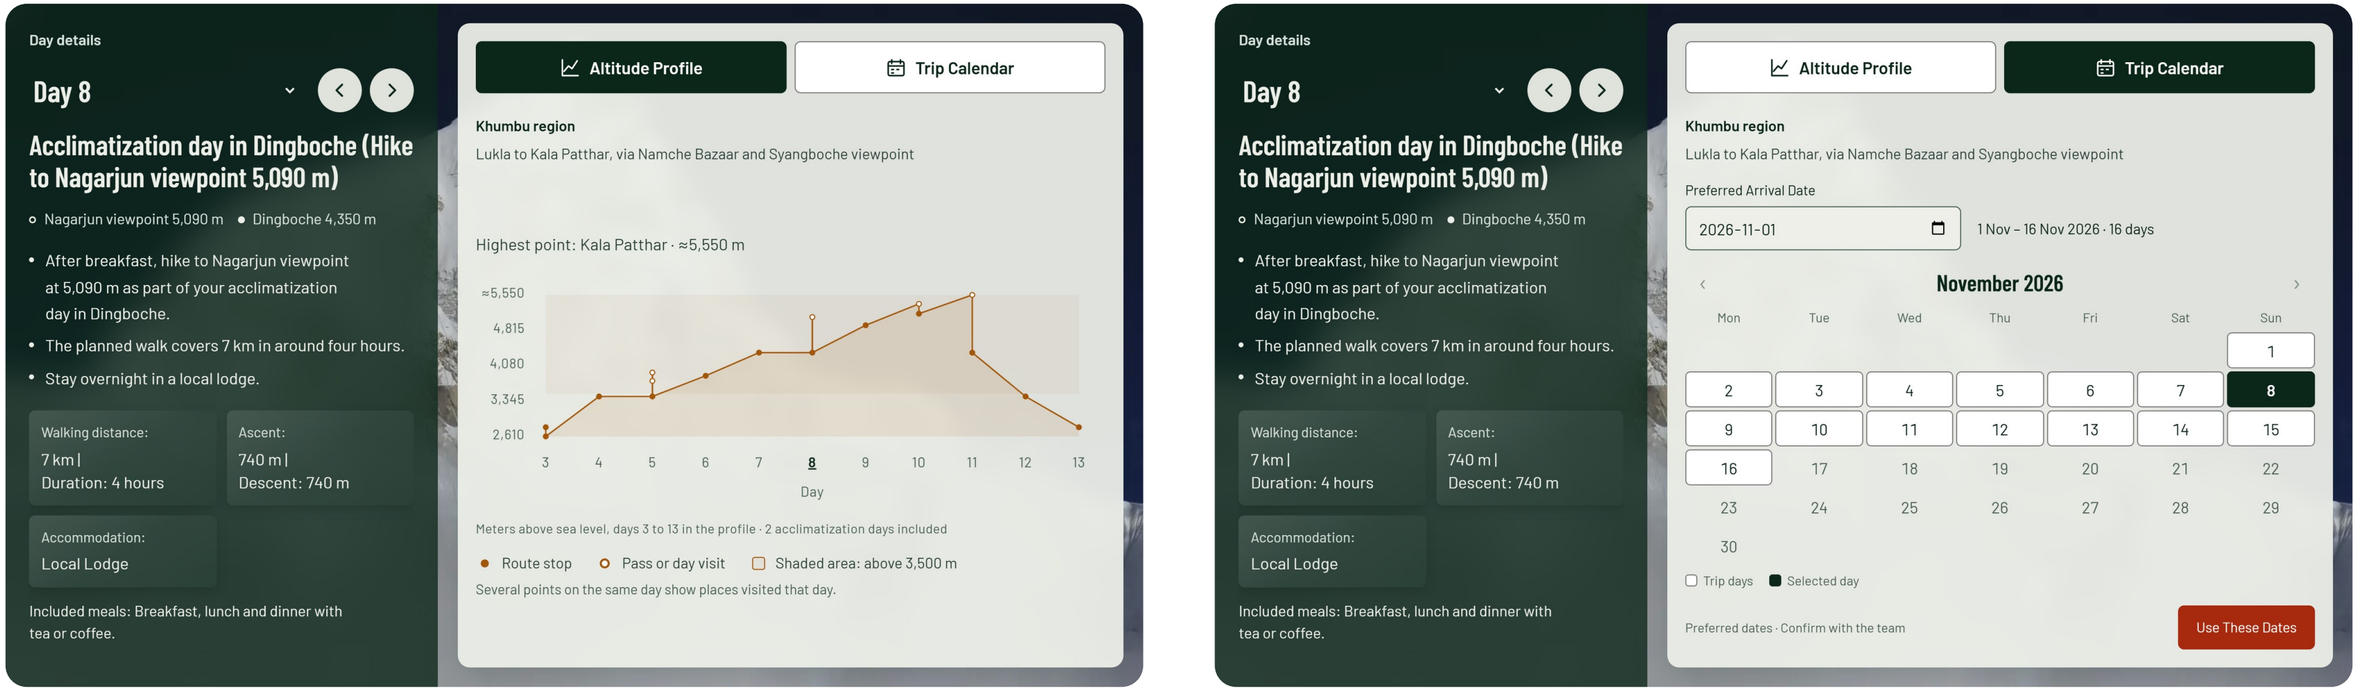

Visit website

Route details, elevation and trip dates.

Select a day to view its trekking details, accommodation and elevation. Enter a preferred arrival date to see the trek's full date range on the calendar.

Route profile / Day 8 in context

Trip calendar / Example arrival date

Live website / The same trek day in both views

Explore the route profile

Make preparation part of the trip.

A trek-specific packing checklist carries the planning flow beyond the booking enquiry.

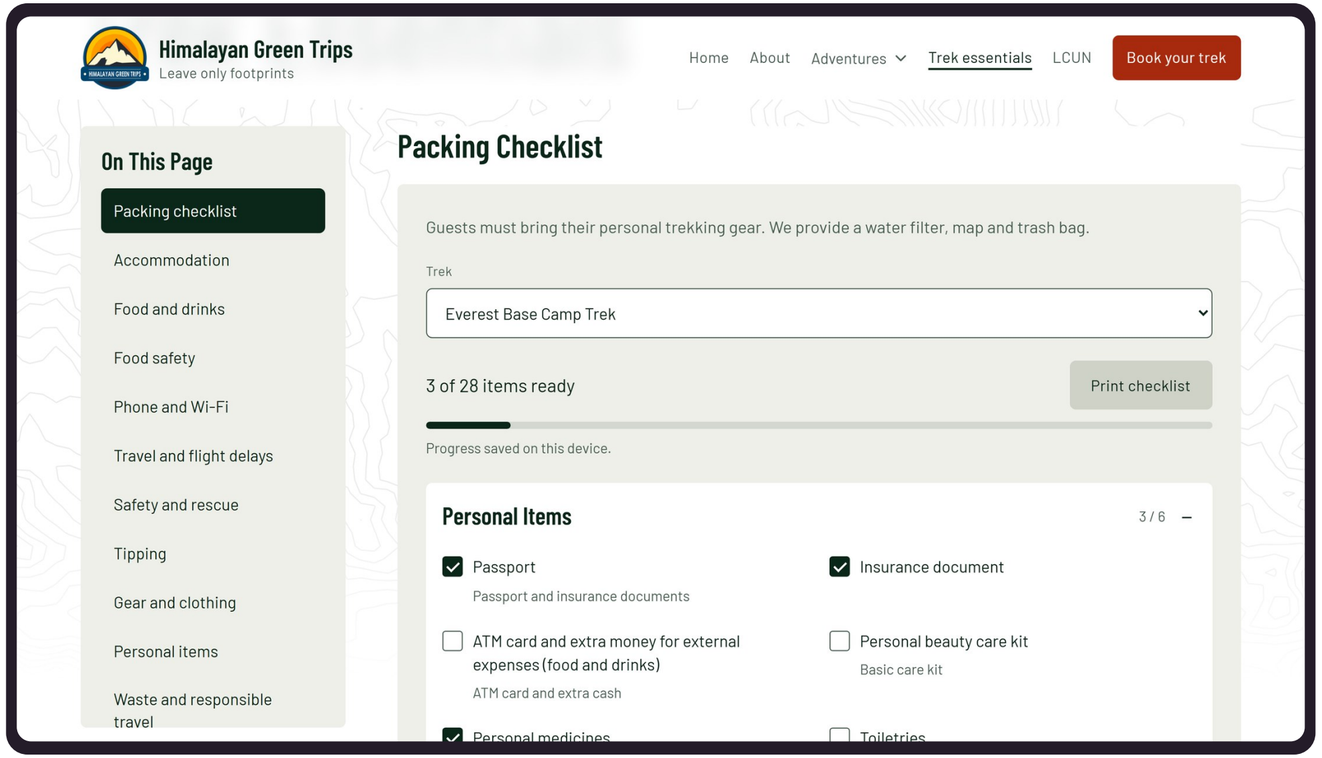

Preparation by route

Choose a trek to load the matching essentials, clothing and equipment.

Room for personal items

Track progress, add personal items and print a copy before travelling.

Explore the packing checklist

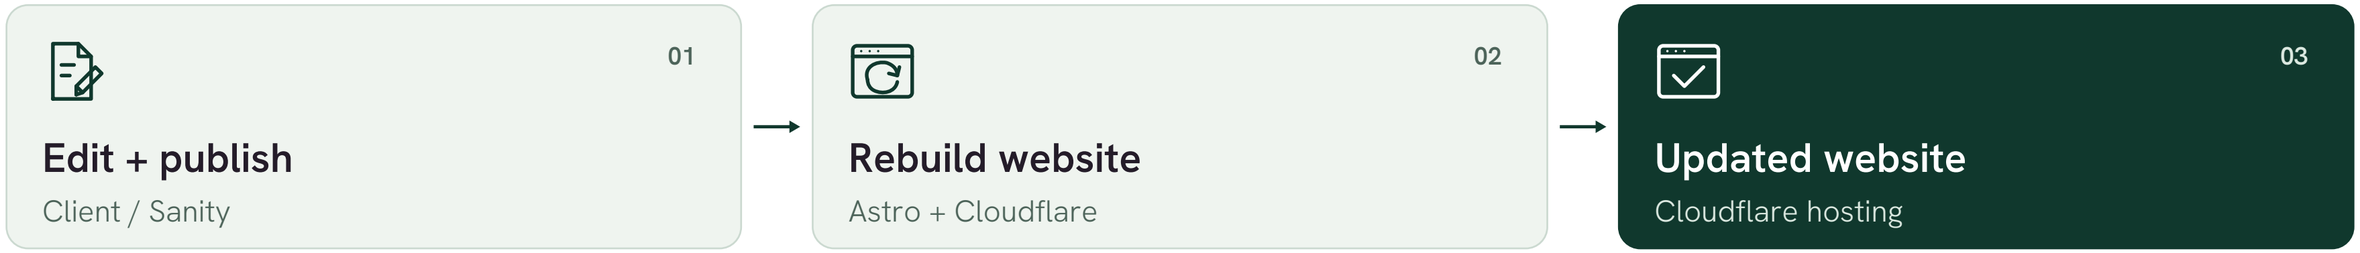

Live website / Example packing state

Make the system maintainable.

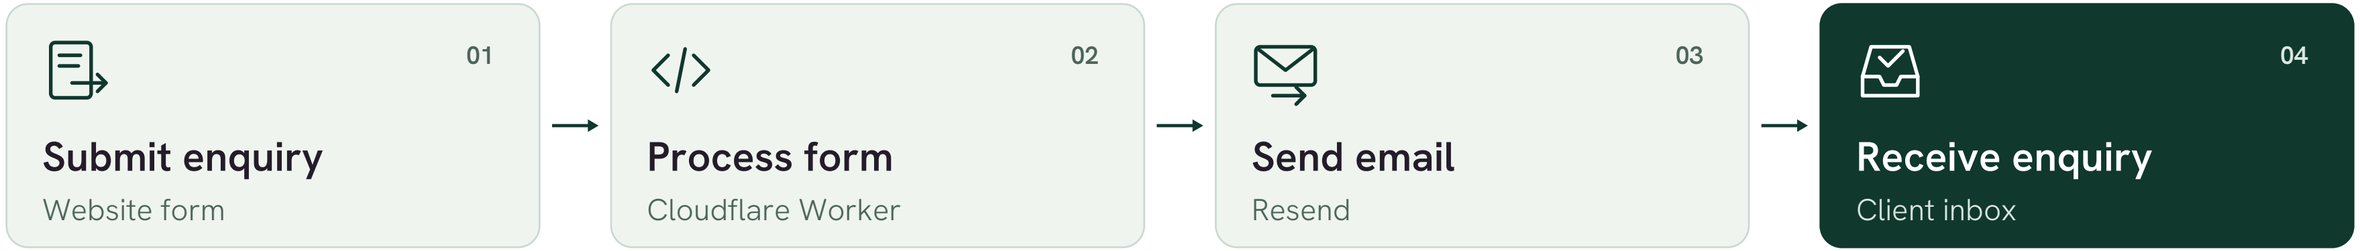

Let the client publish content updates and receive enquiries in their inbox.

CONTENT EDITING AND PUBLISHING / SANITY, ASTRO AND CLOUDFLARE

01 / Content publishing

02 / Enquiry delivery - planned workflow

Custom Sanity editor for content updates. Enquiry delivery shown as a planned integration.

INDEPENDENT PRODUCT / FREE BETA

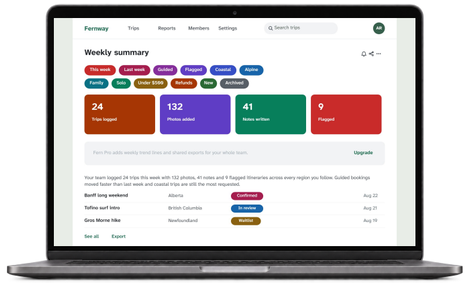

Bezier Loupe

Make visual demand easier to review.

I designed and built a Figma plugin for cognitive accessibility reviews. It measures 12 visible properties of a selected frame, with the source and limits behind each finding.

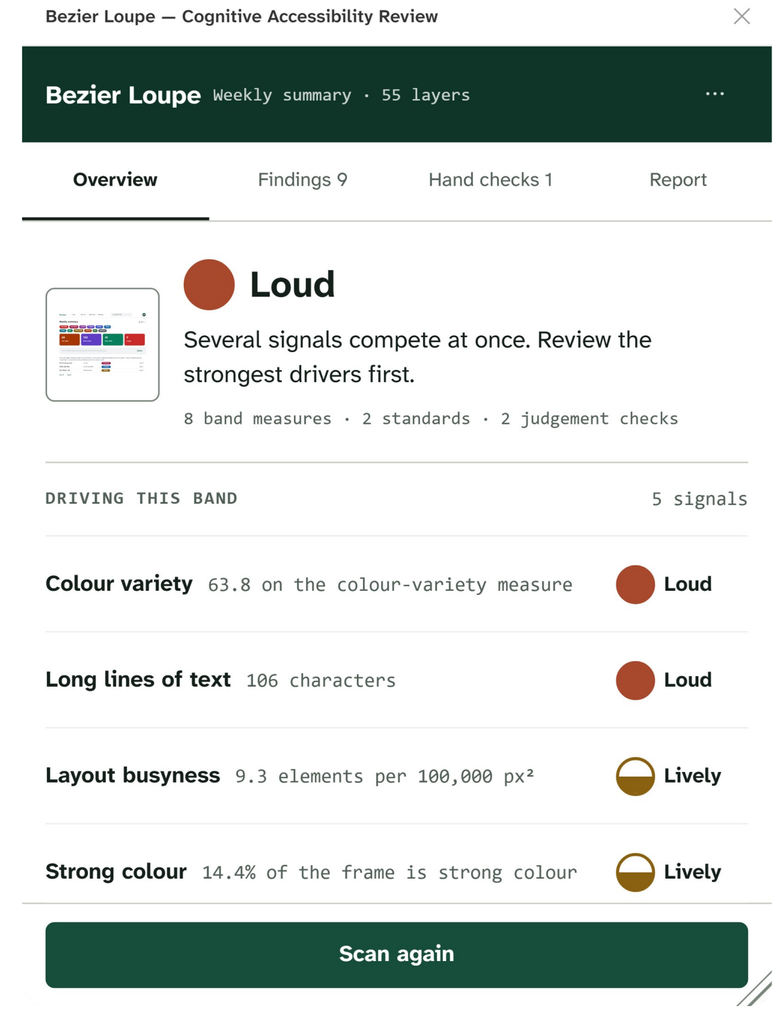

MY ROLE

Independent product design and plugin development, informed by cognitive neuropsychology.

Selected example frame

Calm, Lively and Loud give designers a starting point for reviewing a frame.

Figma plugin / Scan overview

Explore Bezier Loupe

Keep the reasoning visible.

Use the finding as a prompt for judgement.
Inspect the evidence before deciding what to change.

01 / Inspect

Open the measurement, calculation, source and known limit.

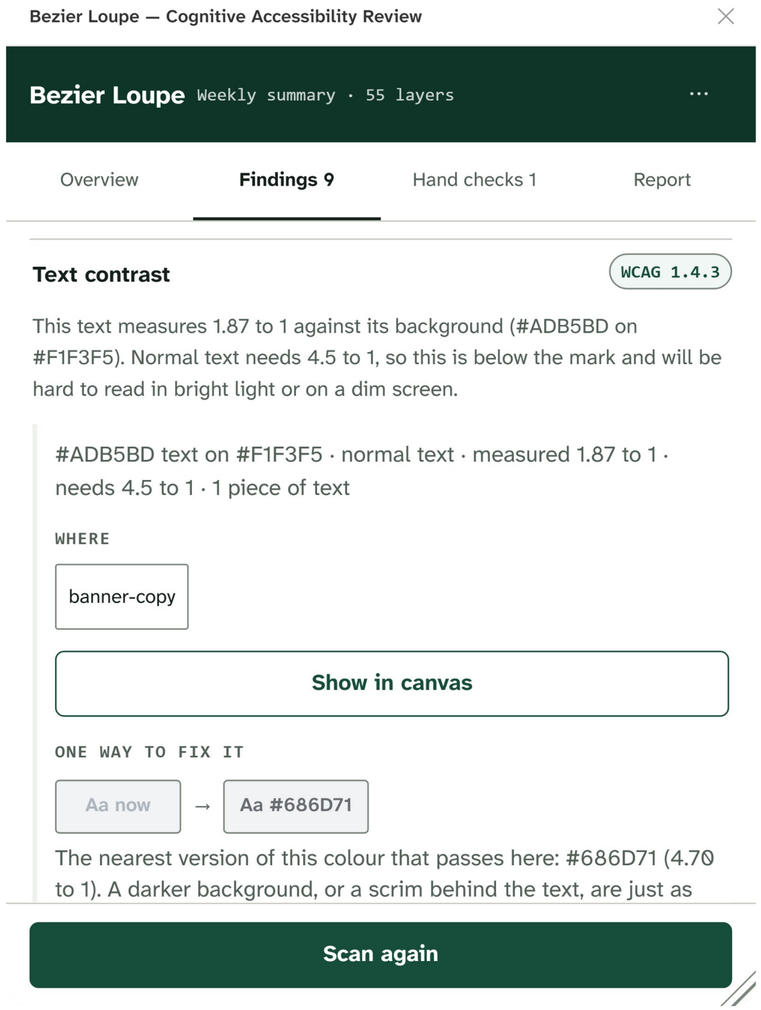

02 / Decide

Weigh the finding against the task and design context.

03 / Keep the reasoning

Export the review as HTML, a print-ready PDF or Markdown.

The tool reviews visible design properties.
It does not establish a person's cognitive load or overall accessibility.

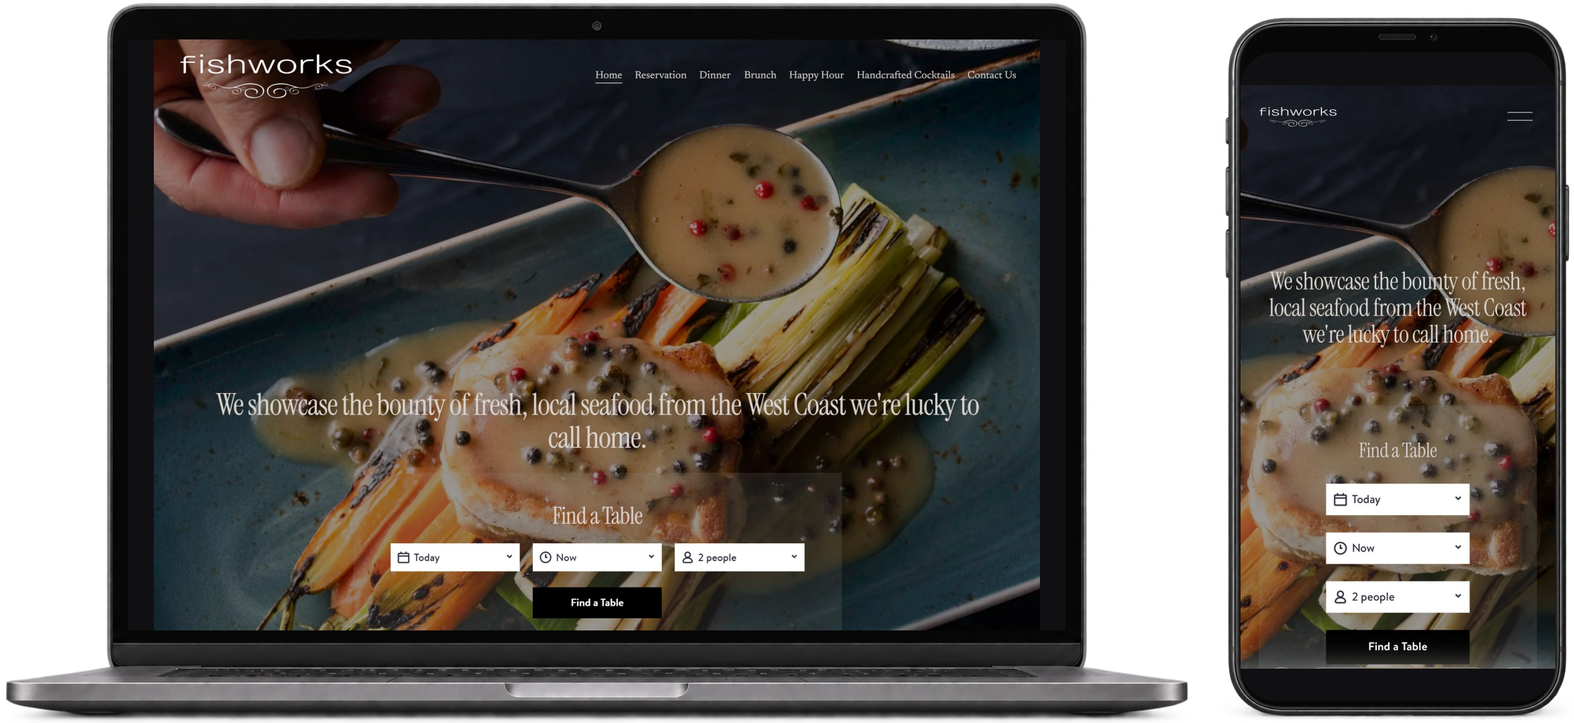

Figma plugin / Expanded contrast finding

COMPLETED WEBSITE / NORTH VANCOUVER

Fishworks

Start the reservation from the first screen.

Responsive homepage / Desktop and mobile

MY ROLE

Website design, content production, copy and visual direction, including product photography.

DESIGN DECISION

Let the food establish the setting. Keep date, time and party size beside the booking action so guests can begin immediately.

Visit Fishworks

Photography that sets the table.

Food and cocktail photography for Fishworks, alongside content production, copy and website design.

How I direct an AI-assisted build.

Product direction, content decisions and final review remain mine.

01	Define the experience	Set the audience, content and product boundaries. My Morning Door keeps practices optional.
02	Build and review	Work in focused iterations, then test the interaction. HGT connects itinerary details with the altitude view.
03	Check the claims	Review accessibility, content and the limits of the output. Bezier Loupe distinguishes measures from heuristics.
